

## COMPRION MoVie

Software for sharing recorded monitoring sessions

01  
02

COMPRION MoVie is a free-of-charge software tool that provides a convenient way to view and analyze monitoring log files recorded on any COMPRION hardware platform/tool. With our viewer, users can analyze recorded trace files on any PC, even without connected test hardware. This makes COMPRION MoVie the ideal solution for sharing

monitoring sessions with colleagues or partners who do not have access to COMPRION hardware.

Additionally, users work within a familiar COMPRION interface, and no data export or format conversion is required for analysis.

### Capabilities

- Display and analysis of trace files
  - Support of different layer views (physical, protocol, transport, application)
- Summary View (synchronized high-level information from all protocols in one compact view)
- Supported protocols: (depending on recorded log file)
  - ISO/IEC 7816 1-4
  - SWP (Single Wire Protocol)
  - HCP (Host Controller Protocol)
  - IC-USB (Inter-Chip Universal Serial Bus)
  - ISO/IEC 14443 Type A, B

### Features known from other COMPRION products:

- Search, analyzers, timing measurements
- View of the complete OTA communication with OTA Remote Management Translator

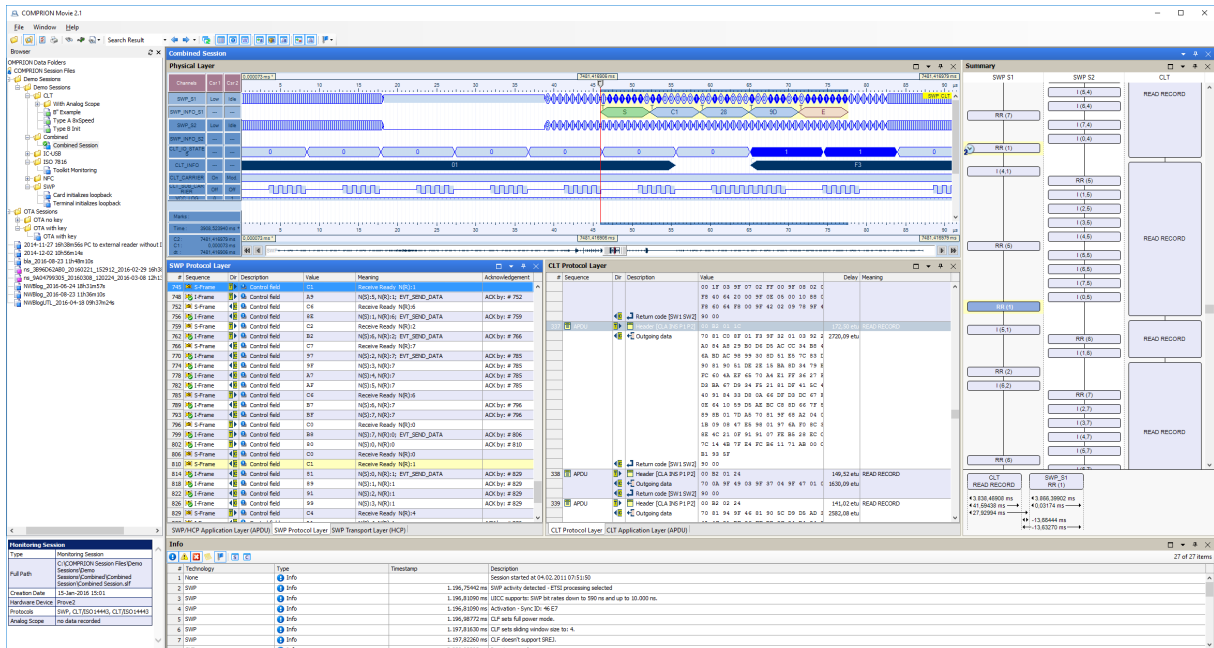

### Use Cases

- Analyze trace files on any PC or laptop without test hardware connected
- Viewing and sharing of monitoring log files provided by our test solutions like NFC Forum, EMVCo, or CCC Digital Key Test Solution.

# Specification

## COMPATIBLE WITH MONITORING SESSIONS RECORDED WITH

- UT<sup>3</sup> Platform
- Prove 2
- MiniMove & Move 2
- Spectro 2 & Spectro TP
- TraceCase
